PROFESSIONAL SUMMARY

Software Engineering student at the University of Central Punjab with 10 months of hands-on industry experience building enterprise-grade web applications for the Government of Punjab. Proficient in ASP.NET Core, Angular, SQL Server, and RESTful API development, with a strong foundation in Object-Oriented Programming, Data Structures, and database design. Proven ability to deliver production systems serving real users in high-accountability environments. Actively seeking an internship or junior role to contribute to impactful software projects.

EDUCATION

B.Sc. Software Engineering | *University of Central Punjab, Lahore* 2023 – 2027 (In Progress)

Relevant Coursework: Object-Oriented Programming · Data Structures & Algorithms · Database Systems · Software Design & Architecture · Web Engineering · Web Development

PROFESSIONAL EXPERIENCE

Software Developer Intern (.NET & Angular) | *Health & Population Department, Government of Punjab*
Sep 2025 – continue

- Developed and maintained enterprise-level web applications using ASP.NET Core, Entity Framework Core, and Angular, serving thousands of government health department users.
- Designed and integrated RESTful APIs enabling seamless communication between Angular frontend and .NET Core backend services across 4 production systems.
- Reduced query response time by ~35% through SQL Server query optimization and caching strategies, improving responsiveness of large-scale government health data systems.
- Engineered responsive UI components using Angular and Bootstrap, improving usability across HR, admissions, and applicant management modules.
- Ensured data integrity and security through structured validation, role-based authorization, stored procedures, and transaction-based database operations.
- Collaborated with senior developers in an Agile team environment, contributing to feature implementation, debugging, and code reviews.

PROJECTS

Horizon Notifier — UCP Student Portal Chrome Extension — JavaScript, Chrome Extensions API (MV3), Content Scripts, Service Workers

Personal Project | https://chrome.google.com/webstore/detail/kjdmbocinichinalcokbjingeoonkbkb

- Built a Chrome extension that aggregates course updates (announcements, materials, submissions, grades, outlines) from the UCP Horizon portal into a single real-time dashboard panel.
- Implemented dual-mode scan architecture: full dashboard scan (Mode A) and per-course background auto-scan (Mode B), both writing to a unified chrome.storage.local layer.
- Engineered multi-user identity detection using student registration numbers — automatically clears stale data on user switch, preventing data leakage between students.
- Achieved zero external server dependency; all data stored locally with real-time badge updates, desktop notifications, and auto-scan on login via Chrome Cookies API.

Hospital Staff on Special Packages (HSPP) — ASP.NET Core, Entity Framework Core, SQL Server

Health & Population Department, Government of Punjab | Professional Internship

- Developed a management system handling hospital staff benefits and special package allocations for the provincial health department.
- Designed normalized database schemas for staff records, package eligibility, and allocation criteria; optimized queries for fast reporting.
- Built HR reporting dashboards enabling department heads to monitor staff benefits and generate summaries on demand.

CHI – Vendor & Applicant Management System — ASP.NET Core, Entity Framework Core, SQL Server

Health & Population Department, Government of Punjab | Professional Internship

- Engineered a comprehensive web system managing adhoc job applications for Community Health Inspector roles, handling document submission, scrutiny, and applicant tracking.
- Implemented role-based authentication and authorization for administrators and reviewers; created dashboards for status tracking and applicant communications.
- Optimized Entity Framework and SQL Server queries to support scalable data retrieval under high application volumes.

Admissions Management System — ASP.NET Core, Angular, RESTful APIs, SQL Server

Health & Population Department, Government of Punjab | Professional Internship

- Engineered a dynamic admissions portal supporting online application submission, document verification, and merit list generation for educational institutions.
- Integrated RESTful APIs for Angular frontend–.NET Core backend communication; implemented real-time notifications and email alerts for applicants and administrators.
- Ensured data security through encrypted storage, validation layers, and compliance with institutional data policies.

Smart Parking System with Analytics — Java, Data Structures, Swing

Academic Project | University of Central Punjab

- Built a real-time parking management system using Circular Queue, HashMap, and LinkedList with VIP prioritization logic.
- Improved average vehicle lookup time by 40% through optimized data structure selection; built analytics dashboard for parking usage reports.

YouTube Clone Backend — Node.js, Express.js, MongoDB

Academic Project | University of Central Punjab

- Developed RESTful APIs for user management, video uploads, and comment functionality with authentication middleware and data validation.
- Optimized MongoDB queries for scalability and fast data retrieval across large document collections.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, Python , C++

Backend: ASP.NET Core, .NET Core, Node.js, Express.js, RESTful APIs, MVC Architecture

Frontend: Angular, React, HTML, CSS, Bootstrap

Databases: SQL Server, MySQL, MongoDB, Entity Framework Core, ADO.NET, Query Optimization

Tools: Git, GitHub, Postman, Visual Studio, VS Code

Concepts: OOP, Data Structures & Algorithms, Database Design, Software Architecture, Agile

CERTIFICATIONS & TRAINING

Machine Learning & Data Science | *Hunarmand Punjab — Government Skill Development Program* 2026 (In Progress)

National Cyber Security | *Hunarmand Punjab — Government Skill Development Program* 2026 (In Progress)

LANGUAGES

English: Professional Working Proficiency
Urdu: Native / Bilingual
